

Bogoan Kim, Ph.D.

RESEARCH INTEREST	My research lies at the intersection of human-computer interaction, digital healthcare, and social computing, with a focus on user-centered AI software. I design and develop data-driven systems that support holistic well-being, drawing on diverse problem-definition approaches—including stakeholder engagement, evidence synthesis (scoping and systematic reviews), and protocol-driven analysis in digital transformation contexts. These systems are designed to capture meaningful behavioral data in real-world environments, informing the development of AI models or the integration of AI as supportive features. Across projects, I emphasize the interplay between technological and social systems, translating these insights into intelligent, personalized, and scalable software solutions.

PATENTS & SOFTWARE

Granted Patent

- A Mobile System for Routine Management in Autistic Individuals
Registration Number: **KR10-2729263** Oct 2024

Filed Patents

- VR Data Analysis Tool to Support Self-Awareness for Autistic Individuals
Application Number: **KR10-2023-0116955** Aug 2023
- VR-based Interactive Social Skills Training System for Autistic Individuals
Application Number: **KR10-2023-0116954** Aug 2023

Registered Software

- VR-based Dashboard for Clinical Support and Patient Monitoring in Depression Care
Registration Number: **C-2024-034698** Oct 2024
